Radial Tweed 1/4" ~ 1/4" and 1/4" 90° ~ 1/4"

High performance and great looks characterize the tweed **Radial Vintage Pro Guitar**, a cable designed for both stage and studio. Five layer construction ensures lowest possible noise and a pure copper 20-gauge inner conductor maximizes signal transfer. Other features include high-temperature PVC insulation, conductive carbon PVC sheath that reduces RF and virtually eliminates handling noise, 95% served shield that does not cause dreaded 'memory twist', an inner PVC jacket for strength and durability, and a braided outer jacket made of rugged nylon tweed that further resists twisting.
