

### PTS-10 110v Line Powered for PVC Insulation

The Patco PTS10 is a portable, 110V thermal stripper that slices the PVC insulation without nicking the wires. Ideal for field and bench-top use. Features adjustable strip gauge for precise cut. Ideal for small wires such as snake and install cable.

Order # P100 1000

- > AC line powered
- > No wire or shield nicking - reduces shorts
- > Solid, stranded or shielded cable
- > Strips #14 to #30 AWG PVC wire
- > Fast, small, portable for improved efficiency

### PTS-20 HD Rechargeable for PVC Insulation

The Patco PTS20 is a *rechargeable* thermal stripper that slices PVC insulation without ever nicking the wires. Ideal for mic, guitar and coax video cable assemblies. Will perform 500 strips with a full charge. Features adjustable cut gauge.

Order # P100 2070

- > Rechargeable stripper with charger included
- > Will not nick or cut fragile wires
- > Solid, stranded or shielded cables
- > Strips #10 to #14 AWG PVC or similar jackets
- > Over 500 strips at full charge

### PTS-30 110v & PTS-40 Rechargeable for Teflon Insulation

The Patco PTS30 is a high temperature 110V portable thermal stripper for difficult to strip, high-temperature Teflon coated, plenum rated cable. Ideal for field and bench-top use. Features adjustable strip gauge.

Order # P100 3000

(PTS-30 - 110v powered)

Order # P100 4000

(PTS-40 - rechargeable)

- > Choice of 110V or rechargeable\* models
- > Will not nick or break fragile conductors
- > Effective on solid, stranded or shielded wires
- > For Teflon or other high-temperature wires

\*Over 100 strips / full charge; battery & charger included.

### PTS-50 110v & PTS-60 Rechargeable for PVC Insulation

The Patco PTS50 is a PVC stripper for coaxial cable that features a dual-indent blade for both outer jacket and inner conductor. Ideal for either field (PTS-50) or desk-top (PTS-40) use. Features adjustable strip gauge for precise cut depth.

Order # P100 5000

(PTS-50 - 110v powered)

Order # P100 6000

(PTS-60 - rechargeable)

- > Choice of 110V or rechargeable\* models
- > No wire or shield nicking
- > Works on both stranded or solid core
- > Strips RG58, RG59, RG62, coax cables

\* Over 500 strips / full charge; battery & charger included.

#### Why the experts use thermal wire strippers...

Even the best quality cable and connectors can be rendered ineffectual if strands or core are damaged during stripping. Patco thermal wire strippers help you minimize signal degradation or sudden loss due to nicked or cut conductors. The pros know that Patco strippers eliminate guesswork and produce consistent professional results, even in the hands of novices. It's easy as one, two, three:

Step 1 - Insert wire into blade.

Step 2 - Twist wire.

Step 3 - Pull insulation off.
