

## Designed without compromise by Radial

Radial Power clean surge suppressors give musicians, engineers, producers, studio owners, commercial facilities, and anyone working with valuable electronic equipment peace of mind protection from power surges that can damage or destroy music equipment instantaneously.

A high-rejection RF interference filter is used to keep high frequencies and AM radio signals out of the power line, preventing contamination of audio signals. Additionally, both Radial Power models include a USB charging port for convenience in keeping mobile devices and accessories charged during recording sessions or performances.

## PUWER-1

- 8 outlets on rear (4 with wall-wart spacing)
- 3 outlets on front (with wall-wart spacing)
- USB charging for personal devices
- Protection active LED indicator
- Illuminated power switch

**Filtering** 

## PUWER-2

- 8 outlets on rear (4 with wall-wart spacing)
- 1 front panel outlet
- USB charging for personal devices
- Protection active LED indicator
- Illuminated power switch
- LED equipment illumination with 7 colors and brightness control

Filtering

## **General Specifications (For Both Models)**

Load Rating: 15 Amps

Max Continuous Operating Voltage: 130V-rms

**Energy Dissipation:** 210 Joules Peak Impulse Current: 20,000 Amps

Noise Attenuation: Differential-mode = 19 dB at 100 kHz, 41 dB at 1 MHz, and 42 dB at 10 MHz

Common-mode = 10 dB at 100 kHz, 41 dB at 1 MHz, and 50 dB at 10 MHz

**Surge Protection Method:** Single mode, line to neutral Power Cable: Approx. 9ft., grounded 3-wire, 14 AWG
