

2026 INTERCOM

 Primacoustic®

REAMP®

**30 True
to Your
YEARS Music®**

30 Years of Reliability and Counting

Since the release of the JDI in 1996, Radial technology has become a fixture anywhere pristine audio is required. We remain committed to providing solutions that help you stay True To Your Music at every point in your musical journey with technology that opens the door to new processes, fresh inspiration, and fosters the creative spirit of music creators, mixers, and technicians. Wherever and whenever you make music, Radial has your back - on stage, in the studio, and everywhere in between.

TOURING LIVE 25-26

**A MESSAGE FOR ALL THE
RADIAL ARTISTS WE'RE ON
TOUR WITH AT EVERY TURN**

Thank you, from Radial to you.

"Hey everyone, we here at Radial just want to thank you, our artists, techs, producers, and engineers who've taken our gear on tour and into the studio to create music wherever you are. We're honored you choose Radial. Thanks for all your support over the years. We look forward to working with you this coming year and beyond. Anything you need in 2026, please reach out to me and our artist support team. We are happy to help."

- Jim Rhodes, Artist Relations Radial Engineering

NEW

SGI STEREO GUITAR LINE DRIVER

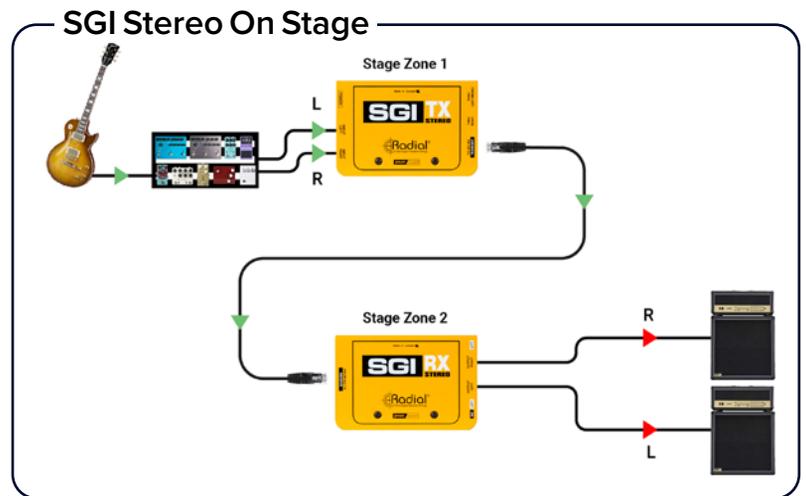

Send Your True Tone Farther in Stereo

The SGI Stereo is a line extension of our high-performance line driver system for guitars and basses. Utilizing active buffering and transformer isolation, it allows you to drive a pair of unbalanced instrument signals and deliver your true tone up to 100 meters (300ft) over a single, economical Cat5 cable.

- **Balanced stereo line driver for pedals, pedalboards, amp modelers**
- **Premium Jensen transformers for optimal sound quality**
- **Delivers natural tone to off-stage amplifiers**
- **Transmits analog audio over a single Cat5 Ethernet cable**

A solution for complex routing systems

The SGI Stereo system is ideal for managing complex stage and studio setups where long cable runs are the norm. Perfect for isolation cabinets, under-stage amps, or remote 'quiet' rooms.

SGI TX/RX GUITAR LINE DRIVER

Now Upgraded with Jensen Transformers

Now equipped with premium Jensen Transformers, the SGI remains a highly popular tool for delivering pristine signal over long distances (300ft/100m). Consisting of the SGI-TX transmitter and SGI-RX receiver, the SGI is compatible with 9V-15V outlets for seamless integration into any live or studio setup.

- **Balanced line driver for guitar and bass**
- **Uses any power supply from 9V to 15V**
- **Delivers natural tone to off-stage amplifiers**

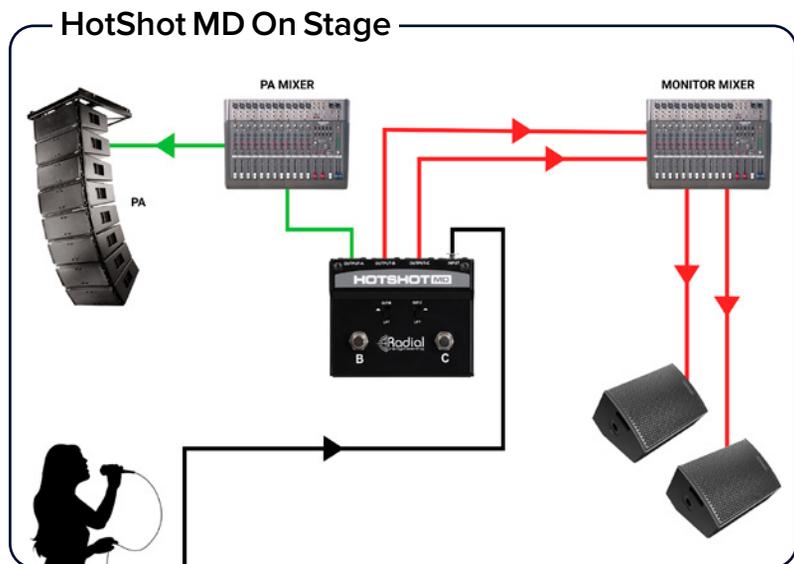

Dynamic Microphone Switcher

Simplify Stage Communication – Call The Shots From One Mic

The newest member of Radial's HotShot family, the HotShot MD, allows users to momentarily reroute microphone signals via two toggle switches to two separate or one combined destination.

- Mute mic signal to the PA for silent communication on stage
- Deploy multiple HotShot MDs as additional communication & flexibility
- Route all three outputs to the PA and talk to two different comms channels with dedicated footswitches

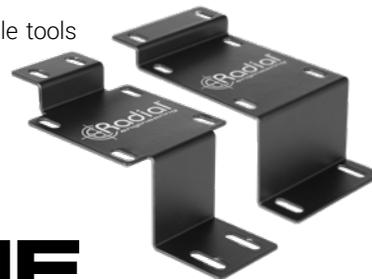

The Perfect Pairing:

Highline & TrainTrack

Combine Radial's new pedalboard mounting solutions with a device that provides true tone from pedal to performance, so your Radial devices and amp sim are always road-ready.

TrainTrack and TrainTrack Plus are simple tools for securely mounting our P-Class devices (ProDI, Highline), J-Class devices (JDI, Highline Stereo), or similar-sized Radial boxes to the underside of a pedalboard.

HIGHLINE

Mono & Stereo Passive Line Isolators

Featuring premium Jensen transformers, Radial's Highline and Highline Stereo passive line isolators seamlessly connect guitar and amp modelers to a mixer while maintaining full signal integrity with no added noise or distortion.

Modern Rig Essentials

Keep Your Rig on the Right Track

TrainTrack + Highline: Elevate Security and Streamline Connectivity with Two Modern Pedalboard Essentials.

UPDATED

VOCO-LOCO Mk2

Mic Preamp and Effect Loop

With a fresh look and additional headroom, the Voco-Loco Mk2 provides the same fun and functionality as our original Voco-Loco Mic Preamp and FX Loop. Allowing vocalists, wind, and blues harp players to incorporate effects pedals into their performances, the Mk2 now also features a locking XLR input for extra stage security, and can be powered via 9V to 18V pedalboard power or the included 15V PSU.

- Recessed switch turns on 48V phantom power for condenser mics
- Dual band EQ to adjust mic tone
- Individual send and receive controls to optimize signal-to-noise and reduce distortion.

What's New Inside

Extended Frequency Response (20Hz - 96kHz)

Lower Total Harmonic Distortion (0.0038% @ +18dBu, 1kHz)

Increased Mic Preamp Gain (61.5dB)

Studio Essentials You Can't Mix Without

At Radial, we recognize that a flexible, high-fidelity signal path is critical to creating and capturing your best work quickly, fluently, and without compromise. That's why we've created a comprehensive ecosystem of innovative studio tools to enhance your performances and process, foster inspiration, and ensure you're always ready to capture the full dynamic range and tonal depth of any source, anytime, anywhere – from front end to final mix.

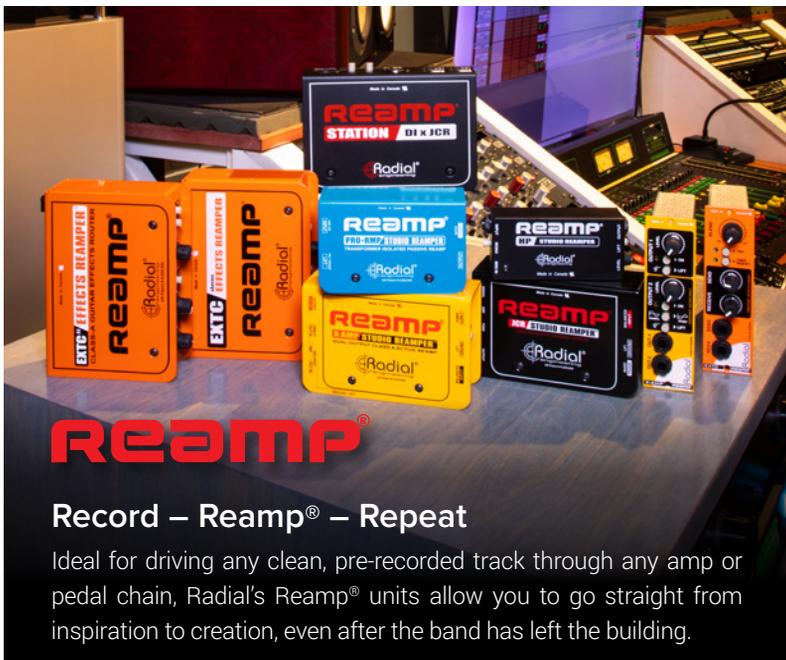

Nuance *select*

Studio Monitor Controller

Featuring an old-school look, along with cutting-edge clarity and audio transparency courtesy of Radial's Patent-Pending Clarity Circuit, the Nuance Select lives up to its name, allowing you to hear every detail of your mix with zero coloration and a distortion profile so low it's virtually undetectable.

- Silently switch between two sets of monitors and a subwoofer
- Dual stereo input sources with an assignable Aux output
- Two independent headphone amplifiers with source selection

Reamp®

Record – Reamp® – Repeat

Ideal for driving any clean, pre-recorded track through any amp or pedal chain, Radial's Reamp® units allow you to go straight from inspiration to creation, even after the band has left the building.

STATION DI x JCR

An active DI combined with our original JCR Reamp® unit – two studio essentials in one box.

HP STUDIO REAMPER

Plug and play and user-friendly, a studio-grade Reamp® unit that does all the impedance matching for you.

EXTC stereo EFFECTS REAMPER

Apply stereo pedals to any source or track to create and A/B new possibilities with an effects interface and Reamp® in one.

HDI

High Definition Instrument Preamp

Featuring a streamlined, intuitive control set, Jensen transformers, and Radial's unique Color control, the HDI is a high-quality DI/preamp for dialling in a record-ready sound in seconds.

gold digger™

4-Channel Mic Selector

A 4-input/1-output mic switcher for seamless auditioning of multiple microphones or wireless systems, via a single preamp with no coloration, noise, or distortion.

TWIN-SERVO

Microphone Preamp

An ultra-low noise, high-performance mic-pre featuring two discrete 990 op-amps based on the legendary circuit originally created by Deane Jensen.

What's new in 2026

New Room Kit Colours

Fresh, curated colour options that let studios personalize their space without compromising acoustic performance.

Expanded Signature Colour Program

An expanded range of designer-grade fabrics for studios that demand refined aesthetics and custom finishes.

Archadia Product Launch

A new, design-forward, fully customizable acoustic panel line that blends visual impact with trusted Primacoustic performance.

For over 20 years, Primacoustic has provided high-performance, highly customizable acoustic treatments for a range of environments. Our responsive team is always ready to help you create exceptional sounding spaces that meet your needs, sonically and visually, to the letter.

- An expansive suite of visually striking, acoustically precise, turnkey acoustic solutions that seamlessly balance performance and aesthetics.
- Expertise in acoustics, materials, and spatial dynamics honed in recording studios and critical listening environments.

Bespoke Colour Extension

Acoustic treatment that blends seamlessly into your design: Ideal for projects where the creation of a truly unique environment is non-negotiable, Signature Suite expands the palette of colours, finishes, and textures available for Primacoustic panels, providing greater design flexibility to help you create spaces as acoustically pristine as they are rich in visual detail.

Features

- Superior sound, custom-coloured to match your look, sound, and style
- A curated suite of colours and finishes featuring designer-grade fabrics from Guilford of Maine
- High-end acoustic control meets design-forward finishes across our product lines

Custom Made Easy

We handle the details so you don't have to, providing everything you require to create exceptional-sounding, design-forward spaces

Room Kit Colours

London 8 / 10 / 12 / 16

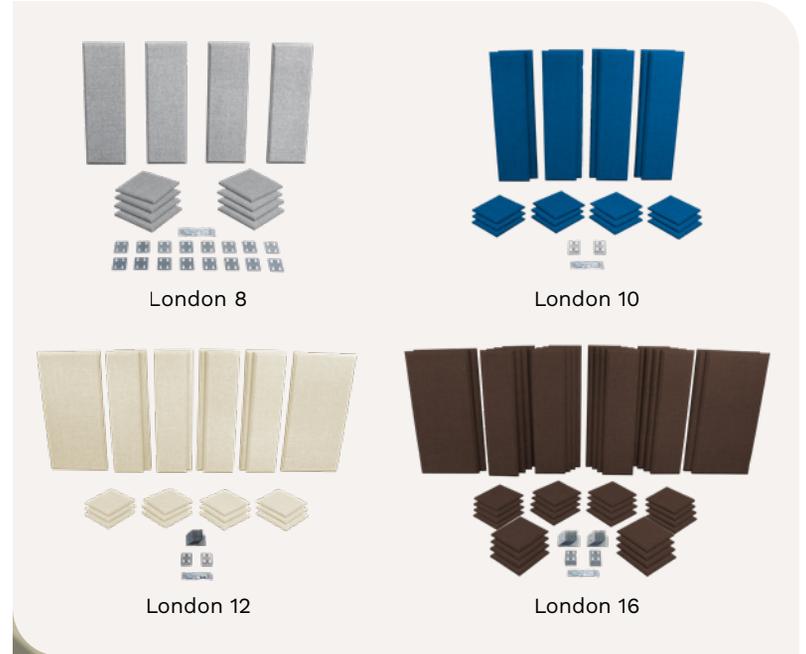

Primacoustic's full room kits are now more flexible than ever. Featuring our high-performance Broadway panels, our London 8/10/12/16 Kits are an ideal solution for any critical listening environment. Now, you can customize your studio's signature look and sound with three new custom colours for our versatile, easy-to-spec and install-ready London Room Kits.

Pre-Packaged for Convenience

To simplify full acoustic treatment projects, we've assembled our London Room Kits, which include the ideal selection of Broadway panels for treating common studio sizes and all the mounting hardware necessary for installing them.

Upgrade your recording studio today with Primacoustic and take your recordings to the next level.

Turn a Good Room Into a Great One

Room Kits are a powerful starting point, but there's no reason to stop there. Primacoustic's wide range of complementary and class-leading acoustic solutions includes wall and ceiling treatments, Slat Wall systems, and many other options. Allowing you to add coverage where it matters most, refine the look, and tailor the performance of your room, easily, as your workflow and design vision evolve.

Studio Tools

Beyond Room Kits

From conception to creation and specification through installation, Primacoustic is your go-to partner for effective studio acoustic solutions. For home setups and pro facilities alike, we offer a comprehensive range of tools designed specifically to ensure you've created the ideal acoustic environment.

FullTrap

Heavy-duty, high-performance bass traps for effectively absorbing frequencies across the entire spectrum down to 125Hz

Recoil Stabilizers

A straightforward solution for reducing vibrations and resonance by decoupling speakers from stands

GoTrap

A portable gobo and bass trap ideal for isolating instruments for live sessions

Cumulus

Tri-corner bass trap for tamping down low-mid buildup in room corners

Stratus Clouds

Reduce ceiling reflections and enlarge your 'sweet spot' by suspending Stratus over your listening position

VoxGuard VU

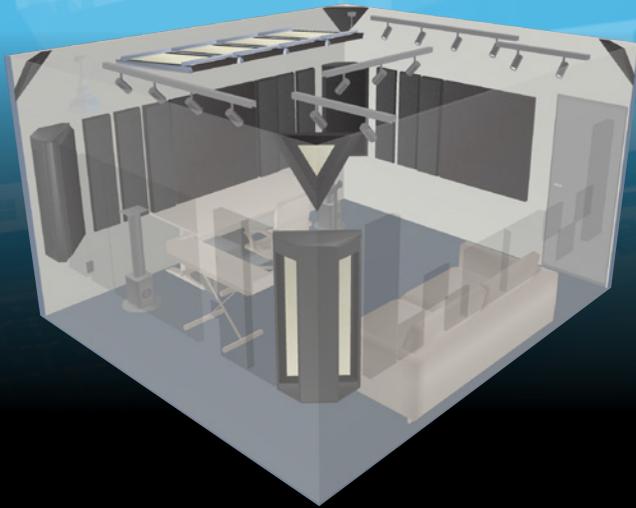

Control ambient sound to create an intimate sound field for pristine vocal tracking with a portable vocal isolation solution
