

# TRAINTRACK

## Pedalboard Mounting Brackets

## Pedalboard mounting brackets for Radial direct boxes & line isolators

The TrainTrack pedalboard mounting brackets are designed to pair any standard Radial direct box with a Pedaltrain® pedal board, so you can easily mount your DI or line isolator under your pedalboard for a more streamlined setup. TrainTrack brackets come with all the hardware you need to securely mount your Radial product on either side of the pedalboard, and use the screw holes that are already on the DI so you can easily remove it for standalone use in the future.

### Features

- Solid metal bracket, keeps your Radial unit in place.
- Mounts flush with either side of the pedalboard for easy access.
- Compatible with Pedaltrain® Classic JR and larger, Temple Audio pedalboards.
- Securely mount any J-Class or Pro-Class direct box.

## TRAINTRACK

The TrainTrack fits all Radial Pro-Class sized units (e.g ProDI, Highline).

## TRAINTRACK PLUS

The TrainTrack Plus matches Radial J-Class sized boxes (e.g JDI, Highline Stereo).

Both TrainTracks are compatible with Pedaltrain® Classic JR and larger model pedalboards, as well as Temple Audio pedalboards.
